

# HORNSEA ONE

25 September 2019, installation vessel Bold Tern installed the last of 91 turbines on Hornsea One offshore wind farm. The complete wind farm consists of a total of 174 Siemens Gamesa SWT-7.0-154 turbines and is the world's largest offshore wind farm to date.

Hornsea One is located 120km from shore which is the furthest from shore an offshore wind farm has ever been built.

## 4 February

Bold Tern set sail equipped with the first load of turbines

## 25 September

Final installation completed (91 turbines out of a total of 174)

## Downtime

Bold Tern completed installation with a minimum of downtime

## 174 SWT-7.0-154

turbines with a total output of 1,2GW - world's largest offshore wind farm to date!
