

GALLOPER

Fred. Olsen Windcarrier joined the Galloper installation project midway in 2017 to support timely completion for client Siemens Gamesa Renewable Energy (SGRE). The scope of work included delivering a fully mobilised vessel, with marine crew for transport and installation.

Galloper Offshore Wind Farm is located approx. 30KM off the coast of Suffolk and has water depths of between 27-36m. The site consists of 56 SGRE 6.0MW turbines of which Bold Tern installed the 17.

Location

Galloper is located 30km off the coast of Suffolk, UK

5 April

Brave Tern began installation on Hohe See

22 December

Final installation completed by Bold Tern

Fact

Bold Tern went on hire within 6 to 8 weeks after initial contact

17 SGRE 6.0MW

turbines with a total output of 353MW
