

HOHE SEE AND ALBATROS

20 September 2019, Brave Tern and Blue Tern successfully finished the transport and installation at the Hohe See and Albatros wind farms where they had worked in tandem installing all 87 Siemens Gamesa SWT-7.0-154 turbines.

Hohe See and Albatros wind farms are located in the German part of the North Sea and this was the largest offshore wind farm project under construction in Germany. The wind farms will provide up to 710,000 households with clean energy.

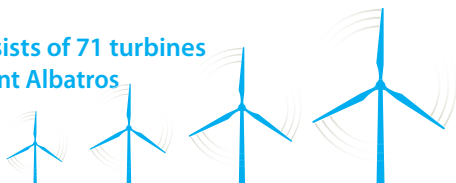

5 April
Brave Tern began installation on Hohe See

20 September
Final installation completed on Albatros by Brave Tern

Fact
Hohe See consists of 71 turbines and the adjacent Albatros of 16 turbines

87 SWT-7.0-154
turbines installed with a total output of 609MW
